

# Namanyanga Primary School Malawi

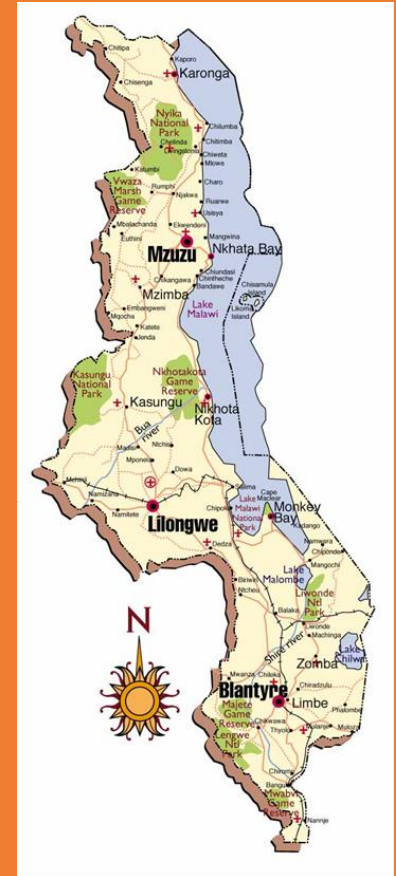

June 2016

Topic

GROWING

# Malawi is a country in Africa.

You are helping the children at  
Namanyanga Primary to have a better  
life.

You are teaching them about life  
in England.

Here are some of the children at Namanyanga school, their teachers and head teacher Mr Jailoti Mussa handing over their information pack.

The letters that the children wrote for you, tell you all about the plants and crops that grow in Malawi.

We showed the children the lovely work you sent them. They were very happy and excited!

We taught the children how to play the bean game. They loved it and it made them laugh.

We gave the children lots of pencils, pens and books with the money that you raised. They were very happy, especially with the football!

Maize is the main crop grown in Malawi.

They also grow a lot of groundnuts. We call these peanuts.

Nyani loved the groundnuts! They taste good!

Acacia trees are grown in Malawi.  
They are used for building and to  
provide shade from the hot sun.

Acacia trees grow quickly.  
This one was planted two years  
ago.

This is how they water plants around the school. Nyani thought it was fun!

These orphans were really happy to  
be given a Coombe Hill sweatshirt.  
Thank you!

Nyani really makes the children smile.

Thank you to all our friends at  
Coombe Hill!
